

BE-1P BELL TRANSFORMERS

An economical short-circuit proof safety isolating transformer to EN 61558-2-8. These transformers are designed mainly for intermittent loading such as bells or chimes.

Standard input voltage 230V 50/60 Hz.

Short-circuit and overload protection by means of PTC in series with primary winding.

IP 40, Class II.

For Surface Mounting.

TYPE	OUTPUT	DIMENSIONS mm.			WEIGHT Kgs.
